Our Mission

V1 Global Aero is a specialized Business Aviation service provider. Our skilled personnel all have the in-depth knowledge gained from extensive experience and training in the development and certification testing of Bombardier Aerospace aircraft. Our wide range of offered services include:

- Specialized functions for our clients such as Acceptance Flight checks, Maintenance Flight checks and assessments prior to a return to service or purchase;
- Performance of "green aircraft" ground and flight assessments for Bombardier customers who may be new to a particular aircraft type through a pending delivery or completion;
- Ferry flight services for Bombardier Aerospace products;
- Flight Training assistance to new start-up regional operators including Simulator and Line Indoctrination training and support;
- Business Aircraft management from your home base or FBO site;
- Providing expert and knowledgeable pilots for our clients as an independent extension to Bombardier's after sales flight support; and,
- Delivery of "Fly Safe in Reduced Space™" special performance airspace training under license and on approval by V2 Aero Training Inc.

Currently our technical focus is on the Global Express, Global 5000, Challenger, the Canadair Regional Jet, the deHavilland Dash 8 Q-Series family of aircraft, and the Embraer EJets.

Our Team

We bring a unique collection of Bombardier and Embraer flying, testing and training experience to our clients. Formal training ranges from Aviation Technology Diplomas to National Test Pilot School courses, Aerobatic and Upset Training and a wide variety of individual Qualification Courses. All of us however, are seasoned former Bombardier Aerospace Production Test Pilots each with several years of recent experience flying and testing Bombardier aircraft in Canada, the United States Europe and Asia. We are licensed by both the FAA and Transport Canada to Airline Transport Pilot standards and maintain appropriate Medical Certificates. Recurrent certification and training is conducted annually with First Aid/CPR and Fire Training conducted regularly.

Our Experience

Throughout our many years of global flight operations our activities have taken us to almost every part of the world. The detailed knowledge gained while operating in each region and country serves to enhance the understanding of our client's needs and specific operating issues.

Detailed Information
